Summary

Aspiring Python Developer and Software Engineer with strong foundations in Data Structures, Algorithms, and Object-Oriented Programming. Experienced in building real-world projects including AI-based detection systems and data-driven applications using Python, OpenCV, and Machine Learning. Solved 450+ DSA problems, demonstrating strong problem-solving and analytical skills. Passionate about developing scalable and efficient software solutions.

Technical Skills

- **Languages:** Python, SQL, Java (basic), HTML, CSS
- **Tools/Frameworks:** Streamlit, Git, VS Code, Google Cloud
- **Libraries/Concepts:** Pandas, NumPy, Scikit-learn, Matplotlib, OOP, DSA, Machine Learning, Debugging
- **Core Strengths:** Data Structures & Algorithms, ML Model Optimization (basic)

Projects

Smart Hostel Issue Tracking System: Designed and launched a centralized web platform to streamline grievance redressal for students, improving operational efficiency and user satisfaction. Implemented a structured database to identify recurring infrastructure issues using data-driven insights

Pothole Detection & Real-time Alert System: Engineered an automated detection system using YOLOv11 and OpenCV with radar fusion, achieving 92% precision in identifying road hazards. Integrated automated voice alerts for real-time safety and adopted a first-principles approach to solve infrastructure challenges.

Personal Finance & Analytics Dashboard: Developed a Python-based tool to analyze user spending behavior and patterns. Optimized data structures to achieve 30% faster query performance using data-driven insights.

Aljust Spoken English Platform: Designed an interactive learning platform using AI voice agents and Firebase, increasing user session time by 40%. Focused on improving user engagement through a localized and relatable experience.

Internship Experience

Proxenix Software Company

July 2025 – September 2025

Data Analyst / ML Intern (Remote)

- Engineered an NLP sentiment analysis model using Python to decode user behavior, managing the project end-to-end to ensure data-backed insights. Optimized model evaluation workflows to ensure high accuracy and on-time delivery in a fast-paced environment.

Education

Madras Institute of Technology, Anna University

Sep. 2023 - May 2026

B.E. Electronics and Communication Engineering

Chennai, Tamil Nadu

Rajagopal Polytechnic College

Sep. 2020 - May 2023

Diploma in Electronics and Communication Engineering

Vellore, Tamil Nadu

Achievements

- Solved 450+ optimized DSA problems on LeetCode using Python to master algorithmic logic.
- Secured 94.3% in Diploma; Ranked Top 3 overall with multiple semester ranks (1st, 2nd).
- Built a community of 2,000+ LinkedIn followers by sharing consistent build-in-public content.

Leadership Experience

- Led project teams of 4–6 members, coordinating task planning, execution, and delivery.
- Completed NSO activities with discipline, demonstrating teamwork and adaptability.

Certifications / Courses

- **Python for Beginners** – *Scaler Academy* – Completed with certification
- **Basics of Python** – *Udemy* – Completed
